The library at the University of Colorado Boulder will play with ever-changing patterns of nature. Combining nature with man-made spaces, the lighting layout, color temperature, and brightness of a space will foster relaxation and productivity based on the users’ need. The university’s library lighting will embrace the innate connection between humans and nature, playing with daylight, skylights, ambient, accent, and task lighting. This design will emphasize on the university and location’s identity.

The ceiling element mimics the role that mountains play during sunset and sunrise by allowing the light to foster relaxation and productivity based on the users’ need. The university’s ever-changing patterns of nature. Combining nature with man-made materials.
